PROFESSIONAL SUMMARY

Final-year B.Tech CS (AI & ML) graduate with hands-on experience in AI agent development, data analytics, web development, and client management. Delivered 3 client projects worth ₹65,000+ through a self-built freelance agency — all via word-of-mouth, zero paid marketing. Fast learner with a track record of turning ambiguous requirements into working products.

EXPERIENCE

Build.ish — AI, Data & Web Development Intern

Dec 2024 – Present

Remote · Self-founded freelance agency

- Built AI agents using LangChain & OpenAI API to automate real business workflows; engineered ETL pipelines on 45,000+ CRM records using Python.
- Designed 6-KPI Power BI dashboards tracking conversion rates, channel performance, cohort breakdowns, and monthly trends for stakeholders.
- Gathered requirements from 8+ clients, converting ambiguous briefs into structured specs — cutting revision cycles by ~40%.
- Delivered 3 client projects worth ₹65,000+: Shopify e-commerce store (₹27k), social media growth campaign (₹36k), and a business website (₹2k).
- Grew a client's Instagram account by 700+ followers in 3 months through giveaway strategy, content calendar, and engagement framework.

PROJECTS

RepoMind AI — Intelligent Code Repository Assistant

N8N · Supabase · Google Gemini · Qwen 2.5 · pgvector · GitHub REST API · Ollama

- Built a multi-layered RAG pipeline that turns any GitHub repository into a searchable, interactive knowledge base using recursive ingestion and vector embeddings.
- Combined Google Gemini and Qwen 2.5 in a hybrid intelligence system — answering complex questions like 'Explain the auth flow' with high accuracy and smart caching.

Customer Segmentation & Churn Prediction — ML Model & Business Insights

Python · scikit-learn · pandas · matplotlib · Power BI · K-Means · Random Forest

- Applied K-Means clustering on 10,000+ bank records and built a Random Forest churn model achieving 86% accuracy (F1: 0.81); delivered a 6-panel executive dashboard with per-segment strategy.

Campaign Performance Analytics Dashboard — Data Pipeline & BI Dashboard

Python · pandas · NumPy · Power BI · MySQL · Excel · Google Data Studio

- Built an end-to-end ETL pipeline on 45,000+ CRM records; produced a 6-KPI Power BI dashboard; identified a Pre-Retirement cohort with 2× higher conversion rate in the stakeholder report.

Antariksh Marbles — Client E-Commerce Website

Shopify · HTML · CSS · JavaScript · Responsive Design · UI/UX

- Built and launched a fully functional Shopify store for Antariksh Marbles generating ₹27,000 in client revenue; live and receiving organic enquiries today.

Sham Di Hatti — Client Business Website

HTML · CSS · JavaScript · Responsive Design · UI/UX

- Designed and deployed a business website for Sham Di Hatti — live, mobile-responsive, and actively receiving organic customer enquiries.
